# LINEAR ELECTRIC ACTUATORS WITH FAIL-SAFE FUNCTION Type ELR2.1, ELR2.2, ELR2.3 

## DESCRIPTION

Electric linear actuators ELR series for modulating and open-close duty of control and process technology to operate control valves.
The self-locking stem/stem nut is driven by an electric motor via a gearing. Load and limit switches define the stops for the end positions.
In case of power failure, the electric linear actuator runs spring driven into the respective fail-safe position (thrust rod either extended or retracted). In modulating duty, the end position seating is made via limit switches.

## MAIN FEATURES

- Electric manual operation with OPEN/CLOSE buttons.
- Mounting to valve made via yoke or mounting flange DIN 3358. The design enables easy connection to all types of valves. Standard version is suitable for Adcatrol valves.
- Generating a defined closing force in the end position leads to constant tight shut-off of the valve.
- The actuators are in enclosure protection IP 54 and are designed for rugged industrial use.
- Stall proof synchronous motors (or brake motors for higher positioning forces) ensure the highest positioning accuracy.
- Mechanical stroke indication via anti-rotation bar.
- Exact, backlash-free measurement of actual valve stroke by direct coupling to the valve stem.
- Universally usable actuators due to control via 3-point-step controllers, analogue input signals ( $0 \ldots 10 \mathrm{~V}, 0(4) \ldots 20 \mathrm{~mA}$ ).
- Easy supplement to actuator with optional devices due to modular design.
- Limit switches, easily adjustable, for stroke limitation or as signal for intermediate positions.
- Integrated, adjustable stroke setting to nominal stroke over the complete stroke range (without exchanging pinions, ...).

## ACCESSORIES AND OPTIONS

| Accessories |  |
| :--- | :---: |
| Yoke for adaptation to valves. Refer to dimension sheet. | STALA / FLA |
| Elastic thrust rod coupling effective on both sides | KUP-EL2 |
| Special finnish coating for use in the tropics ("tropics coating"). | LA-TR |
| Version IP65: with bellows at thrust rod and metal cover with seal (for EL12) | A-IP65 |
| Version with bellows at thrust rod (for EL20, 45, 80 and 120). | A-FAB |

## Options

Additional limit switches for signalling end positions or intermediate positions, freely adjustable, max. 250 V AC, rating for resistive load max. 5 A , for inductive load max. 3 A , max. 2 switches for EL20 and EL45, max. 4 switches for EL80 and EL120.

Additional limit switches for signalling end positions or intermediate positions, freely adjustable, with gold-plated contacts for
low voltage, max. 30 V AC, rating for resistive load max. 0.1 A, max. 2 switches for EL20 and EL45, max. 4 switches for EL80 $\quad$ WE-G and EL120.

Potentiometer 100/130/200/500/1000/5000 Ohms or 10 kOhms
Linearity error £ $0.5 \%$, max. 1.5 W , contact current 30 mA

Electronic position feedback 2-/3-/4-wire system
Inductive travel measuring, output 0 (4)... 20 mA
Connection 24 V DC (not possible for EL12)
Positioning electronics for actuator control
Input 0... $10 \mathrm{~V}, 0$ (4) ... 20 mA , output $0 \ldots 10 \mathrm{~V}, 0$ (4)... 20 mA
