PED/2014/68/EU

CE

Certificate 3.1

Ex

FIRE SAFE
ISO 10497

Size :	DN 100 to 300 mm
Ends :	Between PN40 flanges
Min Temperature :	- 39°C
Max Temperature :	+ 349°C
Max Pressure :	40 Bars
Specifications :	Triple offset Lug type Fire safe according to ISO 10497 : 2010 ISO 5211 mounting pad

Materials : Carbon steel A216 WCB

TRIPLE OFFSET LUG BUTTERFLY VALVE PN40

SPECIFICATIONS :

- 100% tightness
- Lug type
- Between PN40 flanges
- Triple offset
- Bidirectional with preferential flow direction indicated by the arrow (30 bars maximum if the flow is not according to the arrow)
- Fire safe according to ISO 10497 : 2010
- ISO 5211 mounting pad
- Stainless steel CF8M disc
- Full crossing stem
- Bare shaft (possible with gear box Ref.1191)
- Inorganic zinc rich primer, gray color, 10 µm thickness
- Finish painting heat resisting aluminum Silver color RAL 9006, 30 µm thickness

USE :

- Heating, geothermics, industrial cold, shipbuilding, petrochemical
- Steam : 30 bars maximum
- Min and max Temperature Ts : - 39°C to + 349°C
- Max Pressure Ps : 40 bars (see graph), 30 bars if valve installed in reverse flow direction indicated by the arrow
- When using at dead end of pipeline, reverse preferential flow direction
- Max pressure at dead end of pipeline is 30 bars

RANGE :

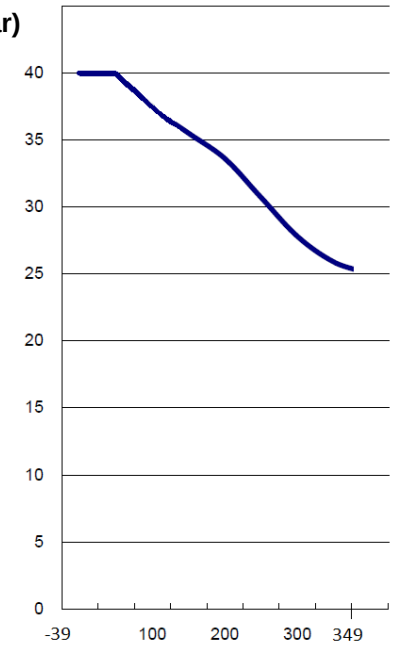
- Triple offset Lug butterfly valve type PN40 bare shaft **Ref. 1118** DN 100 to DN 300
- Gear box **Ref. 1191** from DN 100 to DN 300

ENDS :

- Between PN40 flanges

PRESSURE / TEMPERATURE GRAPH :

PRESSURE (Bar)



TEMPERATURE (°C)

Relation Pressure / Temperature	
Temperature (°C)	**Pressure (Bar)**
0	**40**
50	**40**
100	**37.4**
150	**35.5**
200	**33.6**
250	**30.7**
300	**27.8**
349	**25.9**

TRIPLE OFFSET LUG BUTTERFLY VALVE PN40

TORQUE VALUE (in Nm with safety coefficient of 30 % included) :

DN	100	150	200	250	300
Torque (Nm) at 12.5 Bar	226	429	504	930	1317
Torque (Nm) at 25 Bar	226	429	529	930	1354
Torque (Nm) at 40 Bar	326	719	1058	1826	2707

FLOW COEFFICIENT Kv (m3 / h) :

STANDARDS :

- Fabrication according to ISO 9001:2015
- DIRECTIVE 2014/68/EU : CE N° 0035
  Risk Category III module H
- Designing according to API 609
- Marking according to MSS SP-25
- Tightness tests according to ISO 5208, Rate A and ANSI FCI 70-2-2006 Class VI
- Between flanges according to EN 1092-1 PN40
- ISO 5211 mounting pad
- Length according to EN 558 series 109 (API 609 table 2 Class 300)
- Fire safe according to ISO 10497 : 2010
- Fugitive Emissions according to EN 15848-1 : 2006, Class C
- ATEX Group II Category 2 G/2D Zone 1 & 21 Zone 2 &22 according to directive 2014/34/EU (Optional marking)

TRIPLE OFFSET LUG BUTTERFLY VALVE PN40

INSTALLATION INSTRUCTIONS

GENERAL GUIDELINES :

- Ensure that the valves to be used are appropriate for the conditions of the installation (type of fluid,pressure and temperature).
- Be sure to have enough valves to be able to isolate the sections of piping as well as the appropriate equipment for maintenance and repair.
- Ensure that the valves to be installed are of correct strenght to be able to support the capacity of their usage.
- **Installation of all circuits should ensure that their function can be automatically tested on a regular basis (at least two times a year).**

INSTALLATION INSTRUCTIONS :

- **Before installing the valves,clean and remove any objects from the pipes** (in particular bits of sealing and metal) which could obstruct and block the valves.
- **Ensure that both connecting pipes either side of the valve (upstream and downstream) are aligned (if they're not,the valves may not work correctly).**
- **Make sure that the two sections of the pipe (upstream and downstream) match,the valve unit will not absorb any gaps.Any distortions in the pipes may affect the thightness of the connection,the working of the valve and can even cause a rupture.**To be sure,place the kit in position to ensure the assembling will work.
- **If sections of piping do not have their final support in place,they should be temporarily fixed.This is to avoid unnecessary strain on the valve.**
- Tighten the bolts in cross.
- The disc must move easily inside the pipe.
- Valves must be opened during cleaning operation.
- Tests must be done with a cleaned pipe.
- Tests must be done with opened valve. Test pressure must not be higher than the valve specification according to ISO 5208.
- Then open slowly the valve.
- **Do not mount butterfly valves with stainless steel pressed collars and turning flanges without strias.**
- **And not on flat face flanges without strias (example : painted cast iron fittings)**

MAINTENANCE :

- We recommend to operate fully the valve 1 to 2 times per year.

- During maintenance operation, ensure that the pipe isn't under pressure, that there's no fluid in the pipe and that the valve is isolated. If there's a fluid in the pipe , evacuate it. Ensure that there are no risks due to the temperature or the fluid (like acids). If the fluid is corrosive , inert the installation before maintenance operation.
