

Sampling Valve

I Application

The sampling valves are designed to solve the need to take samples in liquid process facilities in the food-processing and chemical industries as well as in all other processes that require sanitary equipment.

I Operating principle

The sample is obtained by unscrewing the head to separate the membrane from its place to allow the fluid to enter the outlet tube.

I Design and features

Ø available: 1/4" and 1/2"

Thread connection ISO 228-1

I Materials

Metal parts	AISI 304L
Pivot lock	PTFE
O-ring	NBR
External surface finish	Electropolished

I Technical specifications

Max. working pressure	6 bar
Min. working pressure	0,1 bar
Temperature	-30°C to 100°C
	30°C (SIP, max. 30 min)

I Options

Upper level valve.

Upper level valve drain outlet.

Level valve for drain hose.

I Dimensions

DN
G1/2"
G1/4"
